Rob Witoff
Data Scientist, NASA Jet Propulsion Laboratory
ITDS Team
818-354-0299
Robert.J.Witoff@jpl.nasa.gov

Rob is the IT Data Scientist at NASA's Jet Propulsion Laboratory and his team is enabling NASA to explore data in novel ways.

Before JPL, he founded the venture backed startup, Apigy. He has since lead development for interplanetary data visualization software and developed a laser communication system on the International Space Station with the OPALS project.

Rob is NASA's first IT Data Scientist and his data science team incubates solutions to Big Data problems for spacebound explorers, earthborn assets and the people that make them possible.
